PERIPHERAL CLOUD CONSULTING SERVICES

GETTING YOUR HEAD IN THE CLOUD:
OPTIMIZING SOLUTIONS FOR GROWTH AND PERFORMANCE

Highlights

- Develop the right cloud strategy to meet your business needs and execute it.

- Modernize your IT infrastructure while balancing self-service, the needs of the business, and control.

- Create a cloud management regime that defines what needs to be managed, and where and how to manage it.

- Maximize your cloud investment with advanced services such as big data, DevOps, and advanced analytics.

Striking the right balance between agility, efficiency, security, compliance, and integration is the key to a successful cloud strategy. Whether you're faced with migrating applications to the cloud, introducing new cloud native enabled applications, running out of data center capacity, or keeping up with agile development teams, Peripheral consultants create cloud strategies that let you maintain your current business, applications, and revenue while introducing the next-generation cloud model.

Are your current tools robust enough to perform well in a public cloud? Will your existing infrastructure suffice, or do you need to build a new one? Our experts assess your current technical environment to help you determine the answers to these questions. Peripheral consultants offer monitoring and support across multiple cloud providers, help you choose a cloud database platform that's right for your enterprise, and build in advanced analytics capabilities to optimize growth and performance.

WHY PERIPHERAL?

Our cloud teams have more than 215 years of combined experience and have multiple certifications in advanced technologies and public cloud platforms, including Amazon Web Services, Google Cloud Platform, and Microsoft Azure. These teams also deliver progressive cloud services, such as advanced analytics, big data and Hadoop in the cloud, DBaaS, and DevOps.

Peripheral is vendor neutral. While we have deep expertise across a wide set of technologies, we don't sell hardware or software. That positions us to objectively recommend only what's best for your business. Operating with a collaborative and augmented team approach, we offer complete solutions with flexible and agile engagement models.

Peripheral Cloud Consulting Data Sheet

SERVICES

STRATEGY

Striking the right balance between agility, efficiency, security, compliance, and integration is at the core of the strategy that Peripheral experts work with you to develop. The goal is to create a cloud strategy that lets enterprises maintain current business, applications, and revenue streams while introducing the next generation cloud model.

PLANNING

During the planning stage, Peripheral consultants develop a business case and assess the current IT environment. That provides the basis for cloud architecture and design, which leads to an informed selection of service provider and services. From there, we plan for the migration of servers, databases, applications and platforms, and optimize application lifecycles.

IMPLEMENTATION

Implementation is the realization of Peripheral's thorough planning process. Components of your customized solution are developed, installed and configured. Cloud infrastructure and database services are also turned on and configured. Next, infrastructure, platforms, databases, data, and applications are migrated to the cloud. Finally, the application lifecycle is orchestrated, and your new cloud environment is up and running.

MANAGEMENT

There are unique considerations to consider for cloud-based solutions. Peripheral consultants continuously monitor operational health and optimize applications and databases on an ongoing basis. This enables nimble responses to changing markets and business requirements.

NOT YOUR ORDINARY OUTSOURCING PARTNER

TECHNOLOGY-ENABLED EXPERTS

Elite technical teams to help you use technology for competitive advantage. Transform for velocity, automate for efficiency, and maintain operational excellence for security, reliability, and performance.

AGILE, GLOBAL TEAMS

Peripheral hires only elite technical talent, and organizes them into tightly knit, dedicated teams, who are available globally 24 hours a day, seven days a week.

FLEXIBLE CONTRACTS

Peripheral offers flexible, month-to-month contracts so you are not locked in long-term. You can easily increase, reduce, or cancel your contract with only 30 days' notice and experience the Peripheral difference risk-free.

BEST-IN-CLASS SECURITY

Top talent, mature methodologies, and industry-leading tools for complete peace of mind. Our advanced, secure service delivery processes provide the industry's best standard of care for our clients.

ABOUT PERIPHERAL

Peripheral is a global leader in data consulting and managed services. Since 1997, we have specialized in planning, deploying and managing business-critical data systems for large and mid-market enterprises. Learn more about Peripheral and its elite teams of data experts at www.peripheral.com.
